EZYBUILD FACADES PTY LTD IS AN AUSTRALIAN OWNED COMPANY DEDICATED PURELY TO MANUFACTURING DECORATIVE EXTERNAL MOULDINGS AND LIGHT WEIGHT FENCE WALLS.

Management include experienced craftsmen with over 30 years experience in specialised decorative mould-making, reassuring our products are of a high quality and standard. Many standard features and systems are displayed within our detailed brochure. Our experienced staff will liaise with architects and home owners to achieve that unique look, or solve a previous design flaw.

## MATERIAL / BIRD PROOF

The external mouldings are manufactured using a special fortified polymer render cement, encasing polystyrene. The polymer render is mixed in with strands of alkaline resistant fiberglass which binds and hardens the cement. A minimum of 5mm cement is used to encase the polystyrene and in most cases the cement is closer to 10mm in thickness resulting in a rock hard finish that is extremely durable.

A selection of various profiled  
mouldings that can be used  
to decorate around windows,  
doors, eaves, piers and gables

Fencing and feature wall systems that are simple and light weight to install

## MODULAR FENCE AND RENDER PANELS

### MODULAR FENCE SYSTEM FREE STANDING

Never before has it been so quick, easy and cost efficient to have a cement rendered brick fence without using a concreter, bricklayer or renderer.

The system entails a series of light weight piers and panels that simply interlock together enabling a complete fence to be erected within hours, not days.

The system is supplied totally rendered, requiring only a paint finish. Panel and pier arrangements can be suited to accommodate wrought iron in fills and tubular steel. Simply create a hole in the ground and concrete each pier at the required distances.

A "C" channel is then screwed to either side of the pier to allow the panels to slide into. A top capping is then glued to the top of the panel, whilst a number of decorative capping is available for the top of the piers.

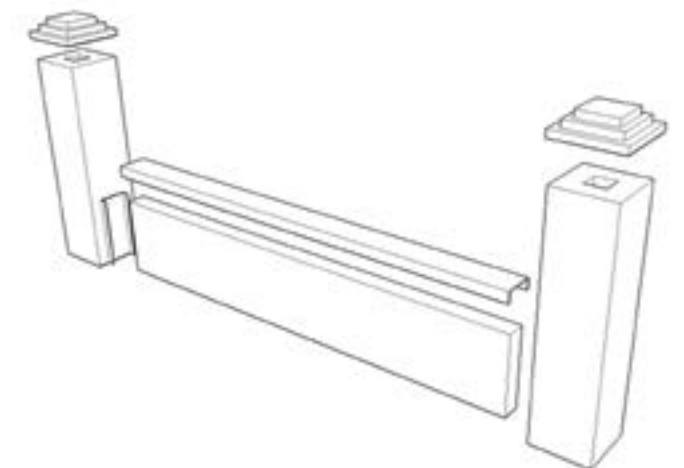

The piers can be supplied at various heights and can incorporate letter boxes inside.

Use the fencing system to create freestanding feature walls that would normally be constructed using expensive methods such as brick laying and cement rendering.

Create a stunning front fence that ensures total security, as well as adding detail to your property.

Apply the product to your pool area as the system is easily adaptable to existing concrete floors without major drilling or digging.

A truly remarkable system, enhancing the look of any home with an emphasis on affordability.

MODULAR FENCE  
AND RENDER PANELS

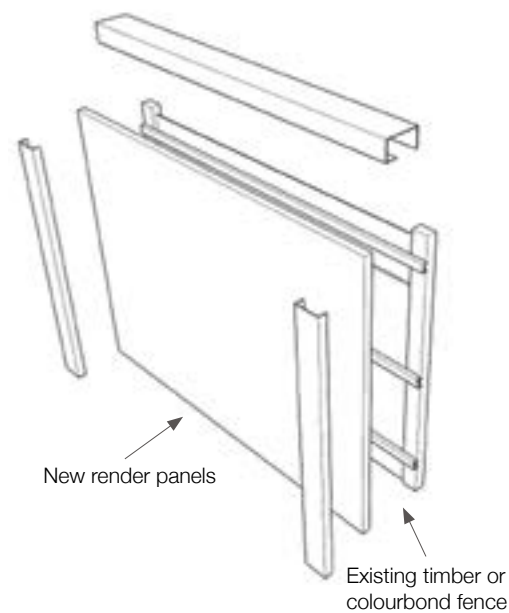

## FENCE RENDER PANELS TO COVER AN EXISTING COLOURBOND FENCE

Pre-rendered panels 40mm thick at various heights and lengths can be directly fixed over an existing fence.

A series of light weight battens are screwed to the existing fence and the pre-rendered panels are glued and screwed to the battens. Panel joints are covered using a selection of mouldings and a top capping is glued over the top to stop any water penetration.

The panels resemble a solid brick render fence which does not encroach or affect neighbouring properties. Screws and any other component of the system are non visible by the neighbour making it a quick and easy concept that truly changes the entire look of a back yard, pool area or courtyard.

The system is supplied as a finished product requiring only paint to be applied once installed. Also a great do it yourself system.

Endless design options  
to create a themed  
courtyard area or a  
pool feature

## POOL AND GARDEN FEATURES

1800 x 1350 x 600mm wide  
**F3**

1100 x 1800 x 300mm  
**F2**

1800 x 1800 x 600mm wide  
**F4**

Choose from a standard range of water features, or discuss your ideas with our consultants to design a unique water garden, pool feature or courtyard area.

Contemporary and traditional architectural elements can be used to create themed outdoor and indoor environments that are limited only by your imagination.

A number of standard plug in water features are available as illustrated to the right.

Modern square  
line projections  
over windows or as  
vertical wall blades

## WINDOW HOODS & WALL BLADES

Modern square line projections  
can be used as sun shades  
over a window or door.

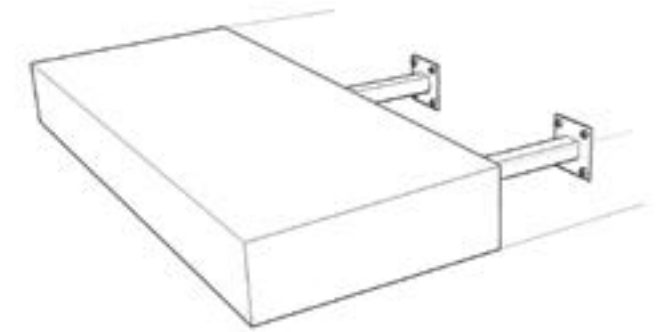

Incorporate them as a design  
feature along the facade of  
a building to add depth and  
design by simply affixing them  
to the wall quickly and easily.

Various sizes are available  
as well as custom designs.  
Manufactured from a light  
weight composite material, they  
offer superior strength and  
are supplied in a smooth or  
rendered finish ready to paint.

The light weight hoods are  
supplied with a drip groove  
to stop water from traveling  
back to the wall. A simple yet  
effective bracket system allows  
the hoods to be installed on  
just about any wall surface  
with ease and confidence that  
the products will not move or  
break away during extreme  
weather conditions.

Typical wall blade arrangement

Typical hood arrangement

Add architectural detail using a range of stack stone panels creating a natural, elegant look, inside and outside the home.

## NATURAL STONE CLADDING

## NATURAL STONE CLADDING

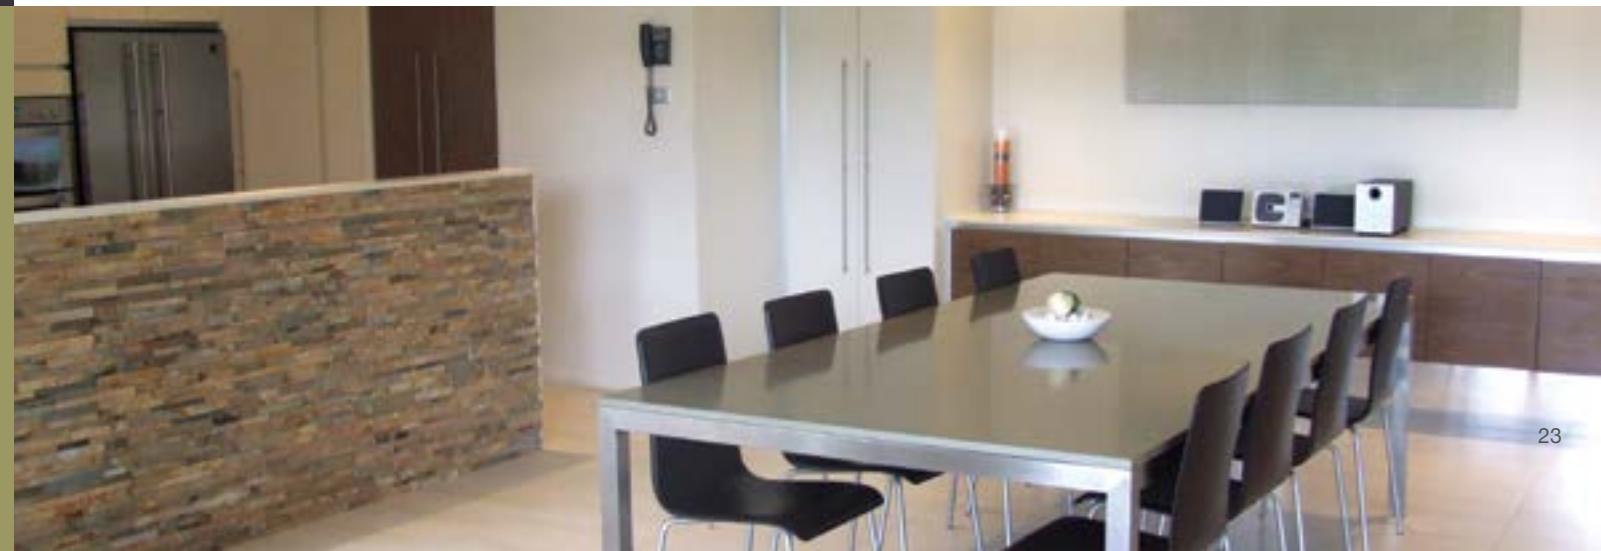

Ezy Build Facades are the importer of a large selection of natural stone cladding for supply directly to builders and the public. Stone cladding allows a natural element to be incorporated in various design situations both internally and externally.

As part of our range we also include a slim line form of stone cladding which is ideal for bathroom feature walls and kitchen splash backs.

Decorate square brick piers outside an entry way, or perhaps add a feature wall inside the home that will never date or require re-painting. Fireplace surrounds are an obvious candidate for natural stone cladding to compliment both contemporary and modern themes.

Natural stone cladding, otherwise known as stacked stone is made up in set panel sizes with a smooth back for easy installation on various surfaces with the application of quick drying glue.
